

FORMALDEHYDE-FREE™THERMAL AND ACOUSTICAL METAL BUILDING INSULATION

COMPANY

Johns Manville, a Berkshire Hathaway company, was founded in 1858. Our ownership by Berkshire Hathaway, one of the most admired companies in the world and one of the most financially secure, allows JM to invest for the future. This enables JM to continue delivering the broadest range of insulation products in the industry and offering innovative solutions that meet your needs.

DESCRIPTION

Microlite® "L" blanket insulation is a certified Formaldehyde-free™ thermal and acoustical fiberglass insulation, specifically designed for lamination to a wide choice of custom vapor-retarding facings. The unique JM manufacturing process provides the Microlite "L" blanket with uniformity that gives the fiber glass blanket a smooth laminating surface.

Microlite "L" insulation is a NAIMA 202-96® (Rev. 2000) Certified Fiberglass Metal Building Insulation produced in a special manufacturing process to give it the structural integrity it needs to recover thickness after lamination, shipping and installation. Microlite "L" is available in wide unfaced rolls suitable for lamination. Check with your laminator/distributor for available facings.

USE

New Construction and Retrofit: pre-engineered metal buildings – roof and walls

INSTALLATION

Microlite "L" is typically installed between or over the purlins and girts. Microlite "L" may be used in both single and double layer metal building systems and will recover to desired thickness when used with various vapor retarders. Actual recovered thickness will depend on the lamination process. Each Microlite "L" roll is ink-jet labeled with the R-value on the top surface of each roll.

PACKAGING

Microlite "L" insulation is compression-packaged for savings in storage and freight costs.

DESIGN CONSIDERATIONS

Microlite "L" is an unfaced fiber glass blanket designed for lamination of various facings for moisture control and provides a desirable finished surface. Microlite "L" complies with NAIMA 202-96® (Rev. 2000) standards to ensure post-lamination R-values. Microlite "L" is available in R-10,11,13,19, 25 and 30.

LIMITATIONS OF USE

Check applicable building codes.

RECOMMENDED STORAGE AND TRANSPORT

Store insulation indoors. Keep insulation clean and dry at all times. When transporting, cover completely with a waterproof tarpaulin as necessary.

PERFORMANCE ADVANTAGES

Formaldehyde-free: will not off-gas formaldehyde in the indoor environment.

Thermally Efficient: provides effective resistance to heat transfer with R-values up to R-30 (RSI 5.29).

Sound Control: reduces transmission of sound through roofs and walls of metal buildings.

Fire Resistant and Noncombustible: See Standards and Codes.

Durable Inorganic Glass: will not rot, mildew or deteriorate and is noncorrosive to pipes, wiring and metal studs.

Superior Performance: bonded glass fibers are dimensionally stable and will not slump within the wall cavity, settle or break down during normal applications.

ENERGY AND ENVIRONMENT

FORMALDEHYDE-FREE™ THERMAL AND ACOUSTICAL METAL BUILDING INSULATION

APPLICABLE STANDARDS & BUILDING CODE CLASSIFICATION

MICROLITE "L" INSULATION

International Building Code (IBC), All Types

Certified Fiber Glass Metal Building Insulation: NAIMA 202-96® (Rev. 2000)

Surface Burning Characteristics, Flame Spread 25 or less, Smoke Developed 50 or less: ASTM E84

Noncombustible: ASTM E136

STANDARD SIZES**

SPECIFICATION COMPLIANCE	R-VALUE (POST-LAMINATION)		THICKNESS (POST-LAMINATION)***		ROLL SIZE					
CUIVIPLIANCE	hr•ft²•°F/Btu	(m²∙K/W)	in	(mm)	WIDTH in (mm)		LENGTH ft (m)			
ASTM C991 Microlite "L" Type 1	30	(5.29)	8.70	(221)	36 (914)	48 (1219)	60 (1524)	72 (1829)	27	(8.23)
	25	(4.40)	7.50	(191)	36 (914)	48 (1219)	60 (1524)	72 (1829)	30	(9.14)
	19	(3.35)	5.60	(142)	36 (914)	48 (1219)	60 (1524)	72 (1829)	50	(15.24)

Technical specifications as shown in this literature are intended to be used as general guidelines only. Please refer to the Safety Data Sheet and product label prior to using this product. The physical and chemical properties of thermal and acoustical fiberglass insulation listed herein represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice. Any references to numerical flame spread or smoke developed ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with the sales office nearest you for current information. All Johns Manville products are sold subject to Johns Manville's standard Terms and Conditions, which includes a Limited Warranty and Limitation of Remedy. For a copy of the Johns Manville standard Terms and Conditions or for information on other Johns Manville insulation and systems, visit www.jm.com/terms-conditions or call 800-654-3103.
